artifact:

a comic essay about a revision of a revision assessment rubric for student writing

Karah Parks, San Francisco State University

Abstract

Many scholars have examined the ecosystem of the writing process in pursuit of more effective composition pedagogies over the past forty years. Of current interest are ways of applying community-centered, participatory approaches to the assessment and revision stages of writing as a non-linear process, uniquely traversed by each individual within a larger discourse community. Several recent studies have demonstrated that this kind of approach to revision and assessment increases students' confidence as writers and their value for revision in particular as a discrete part of the writing process. However, despite these findings both past and present, revision continues to be taught as an afterthought at the end of the writing process, and many students lack confidence to both produce and engage meaningful feedback that leads to better revision work, and, eventually, better writing. The content of this comic essay is a metacognitive journey about my revising of an assessment rubric of revision work performed in an advanced writing course for English speakers of other languages (ESOL) at the community college level. It reviews and integrates what scholarship has taught us about revision and assessment starting with foundational writing process theories and ending in their relationship to current social justice pedagogies in composition courses that seek to empower students by involving them in the assessment cycle. Along the way, I reflect on ways I have practically applied these theories in my own classroom, and in the process, share what was learned, reinforcing what the literature up to now has stated: allowing more time and space to teach and practice revision, providing regular assessment of feedback throughout the writing process, and designing assessment in collaboration with students to assess revision, can enrich students' value for revision and confidence as writers.

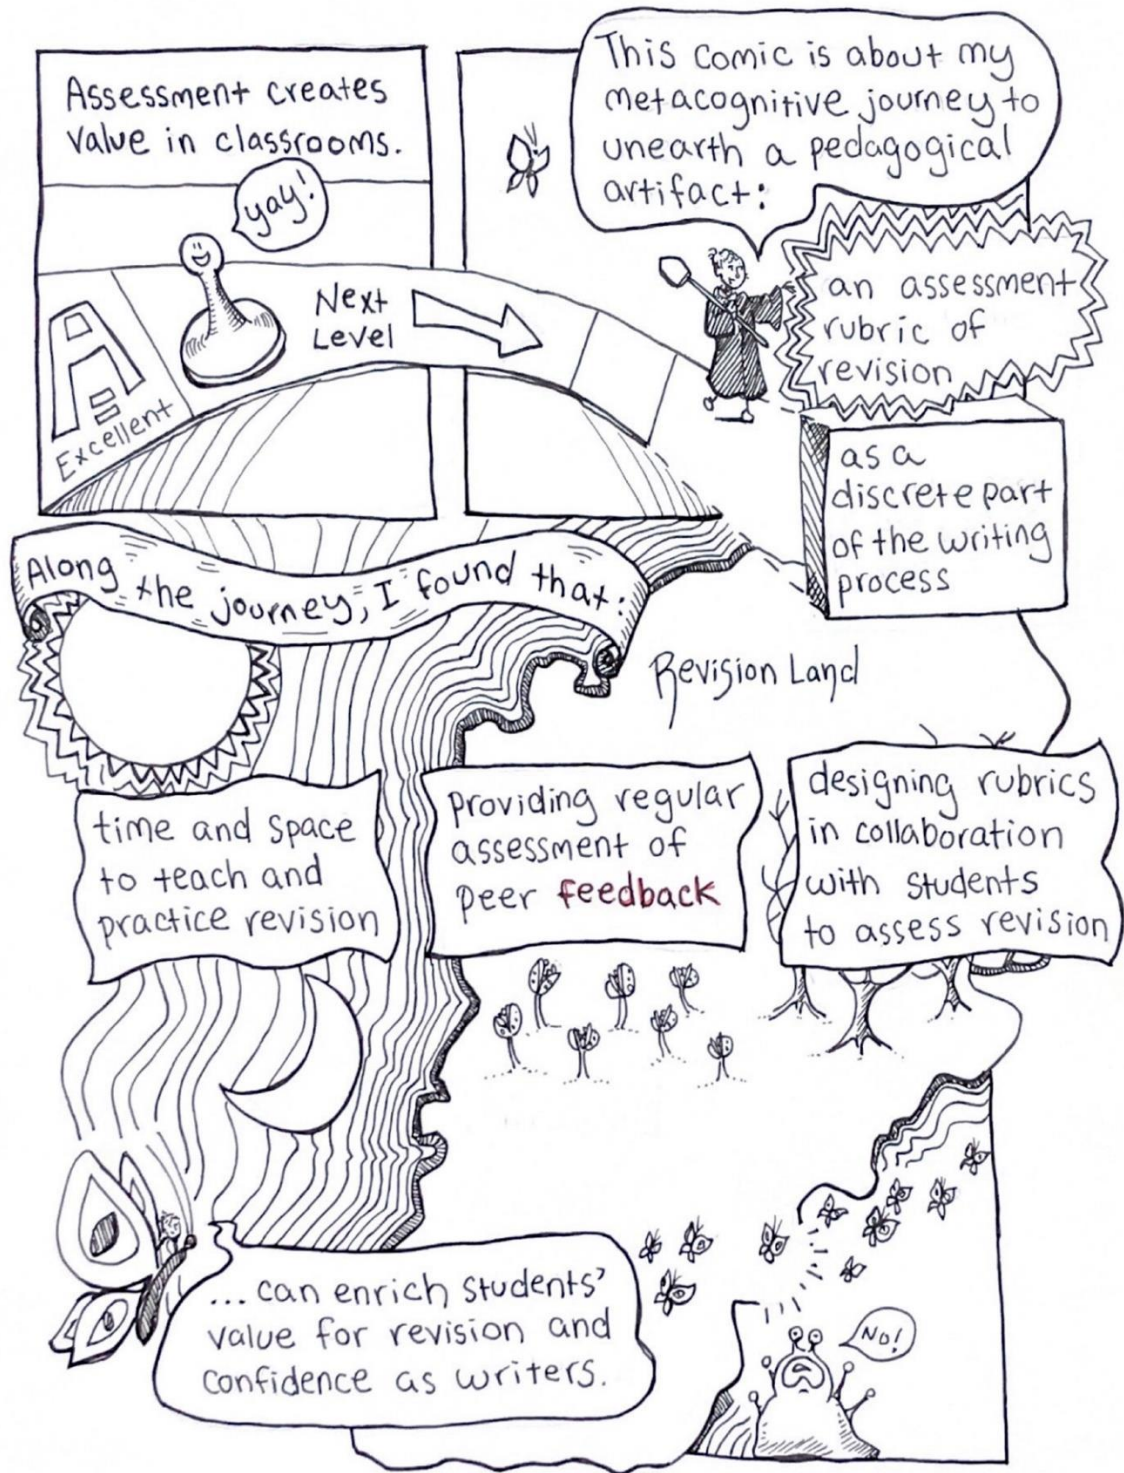

L A Z Y
I can count on one hand the number of students who have claimed laziness as the reason they don't revise.

I came to wonder:
How can I help students overcome these barriers and value the revision process

But I strongly suspect other barriers lie beneath that claim.

Pedagogical Artifact

Wouldn't it make sense to review process first?

Not part of my artifact

Drafts/Process	2	1	-
This portfolio....			
15. was submitted with one or more peer reviewed drafts for each writing project			
16. was submitted with response sheet or in-text responses to at least one partner's clear and actionable feedback for each writing project			
17. shows evidence of careful proofreading and attention to at least one colleague's clear and actionable feedback for each writing project			
18. includes one or more pages of self-reflection and evaluation in-text or in a cover letter about the particular genres of the writing chosen			

Do I want students to fill this in?

I'll share my revision process of the part of my original rubric that assessed the students' revision process for a writing portfolio in an advanced ESOL* writing course at the community college level.

*English Speakers of Other Languages

Researchers wanted to pinpoint observable strategies that mature writers use in revision to help teachers teach and assess revision as part of the writing process.

These researchers' theories form the bedrock of values underlying current studies, theories, and best practices today.

* author was unable to find images of Linda J. Carey for purposes of illustration

Sommers's study begins with a Critique.

Planning
Organizing
Goal setting
Translating
Evaluating

...the linear models [of the writing process] reduce revision ...to no more than an afterthought.

Revising

(P. 397)

...Writing appears to be more like a seed than a line.

(P. 386)

A seed does not grow linearly, at the same rate, or in an orderly fashion.

Sommers found in her study that mature writers had a better sense of their writing as a whole as well as in detail.

[When students are taught to see and re-see their writing this way

They better understood the recursive nature of revision, seeing their writing from many angles.

they will revise more successfully.]

In 1986, Flower et al. conducted a study similar to Sommers?

Mature writer student vs. Writer

..Hm m m m

Results

The key process [in revision] may not be reading but building a working image of the text.

As an artist, I find this idea of revision as closer to seeing than reading...

(P. 18)

...intriguing

Ⓛ Ⓛ Ⓛ

I move backwards and forwards in a constant effort to gain consonance, balance in the whole piece.

This is another useful metaphor I can use to help students understand the revision process.

Students + revision 4Eva

Perhaps understanding will lead to value.

Being experts in Cognitive Process Theory, Flower et al. (1986) wrote in more detail about the process of revision. They found mature writers have two important revision qualities.

A revisor's intention is defined in two parts: a sense of what is being asked and a plan for how to accomplish it.

Let's move into ardha Chandrasana.

Ardha Chandrasana = Half Moon

1. Engage core
2. Push off back foot
3. Arch back
4. Lengthen torso
5. Don't Panic

Providing steps to leverage both knowledge and intention in revision, Flower et al. present this useful heuristic based on their research.

For my artifact to work, I need to give students space to practice building the skills for each part of the revision process.

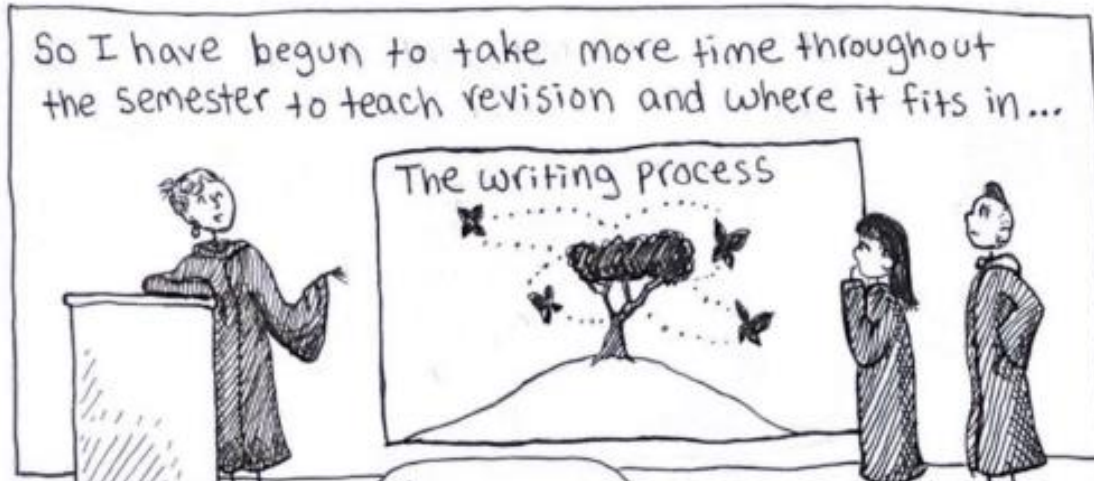

Criteria			
1			
2			
3			

It's only fair I give them space and time.

Since I'm evaluating them on their abilities to participate in this process.

Syllabus

Most assignments can be revised for a better grade
 ☆ within a time students and I negotiate.

I've also given students more space to revise.

A colleague

But isn't all that re-grading overwhelming?

It's not bad actually... Not everyone revises. And since time is negotiated, students take it more seriously.

I have found that these two practices have normalized revision as part of the writing process rather than a punishment for "failed" writing.

This is ok.

BUT can they participate in the revision process effectively?
RAWR!

[we found it was better for low-level L2 writers to give feedback, especially on global errors than to receive feedback.]

...The evidence from my research suggests that it is not that students are unwilling to revise, but rather they do what they have been taught to do in a consistently narrow and predictable way. (p.383).

So, student writers need to be trained to evaluate others' writing in a less linear fashion. In order to see their writing through others' eyes?

Exactly!

So, my pedagogical
artifact creates
value ...

Drafts/Process This portfolio....	2	1	-
15. was submitted with one or more peer-reviewed drafts for each writing project			
16. was submitted with response sheet or in-text responses to at least one partner's clear and actionable feedback for each writing project			
17. shows evidence of careful proofreading and attention to at least one colleague's clear and actionable feedback for each writing project			

... so I can more fairly
assess them.

A few years after Lundstrom and Baker's study, Cho and MacArthur (2011) conducted a similar study to test their hypothesis of "Learning by Reviewing."

Reading Condition:

Students read peer work in genre.

Reviewing Condition:

Reading and Commenting on peers' work in a genre.

Control:

Reading other various texts.

[We trained students in the reviewing condition to use a genre-based rubric as a map to evaluating student writing and giving feedback.]

[And the reviewing students' writing improved most! This is because] peer reviewing requires students not only rate peers' writing but also provide comments that explain particular problems and suggest solutions. (p. 78).

Rubric

Will you give me feedback?

of course!

Hmmm... I'd like to hear more about using a rubric to evaluate a specific genre....

...to value each other's feedback more, because I give them feedback on their feedback so they can grow.

Collaborative building of a genre-based rubric leads to increased student engagement as well as recognition of audience and genre.

17. shows evidence of careful proofreading and attention to at least one colleague's <i>clear and actionable feedback</i> for each writing project			
18. includes one or more pages of self-reflection and evaluation, either in-text or in a cover letter about the particular genres of writing chosen			

Skill Htg
I want ss to fill this in
?

part of whole essay assessment

Is this harsh? should 0 be on the rubric?

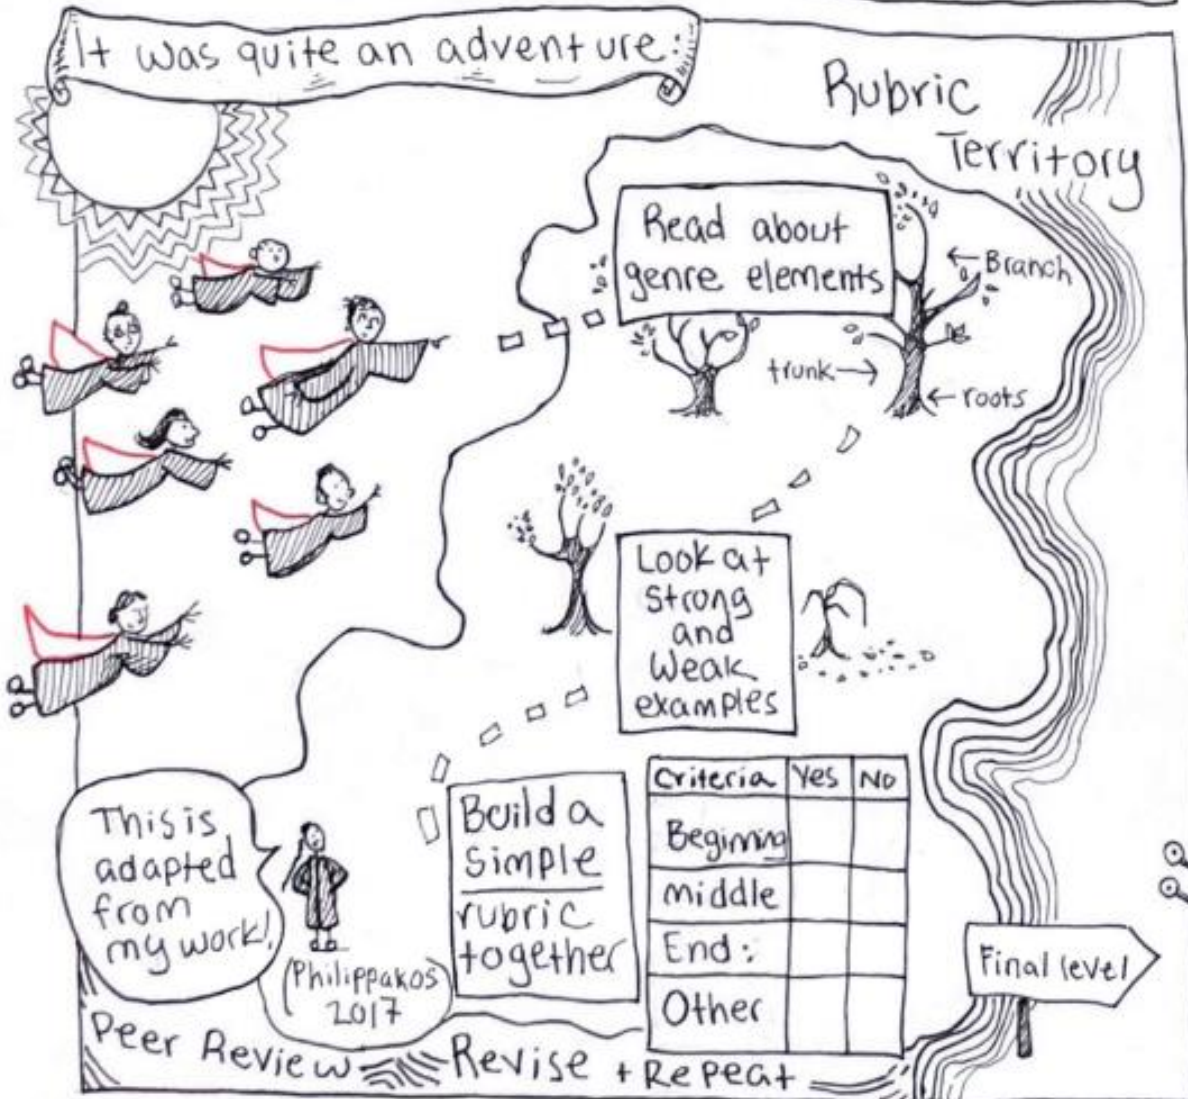

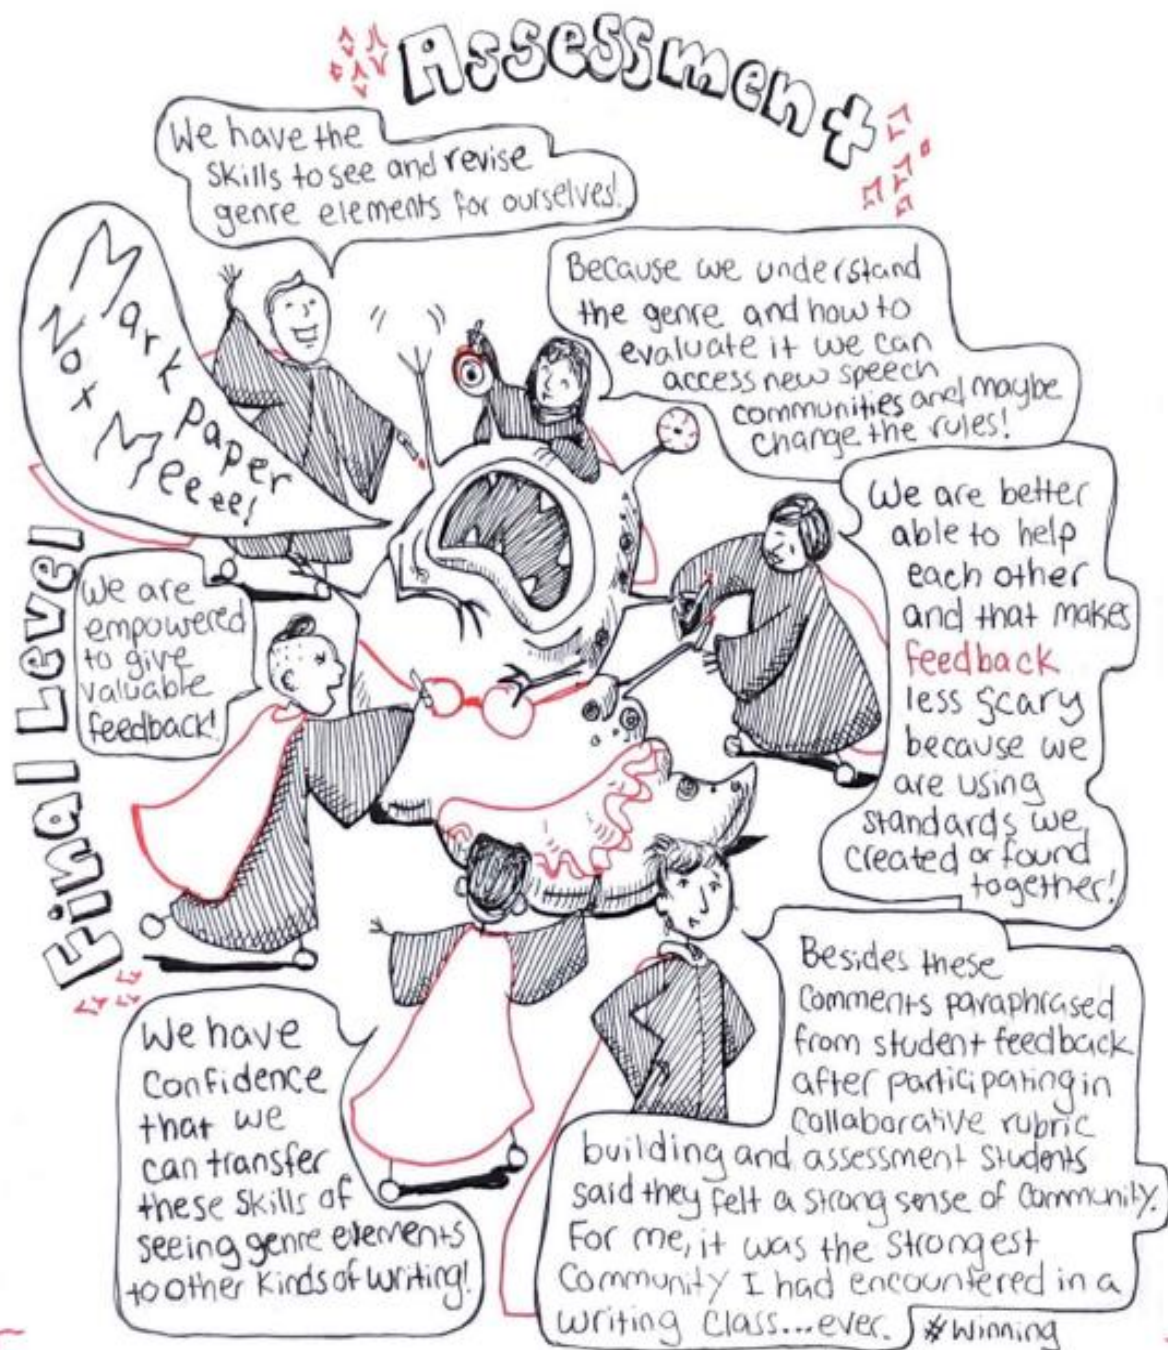

In fall 2019, I tried collaborative rubric-building in my advanced ESOL Writing class for the first time.

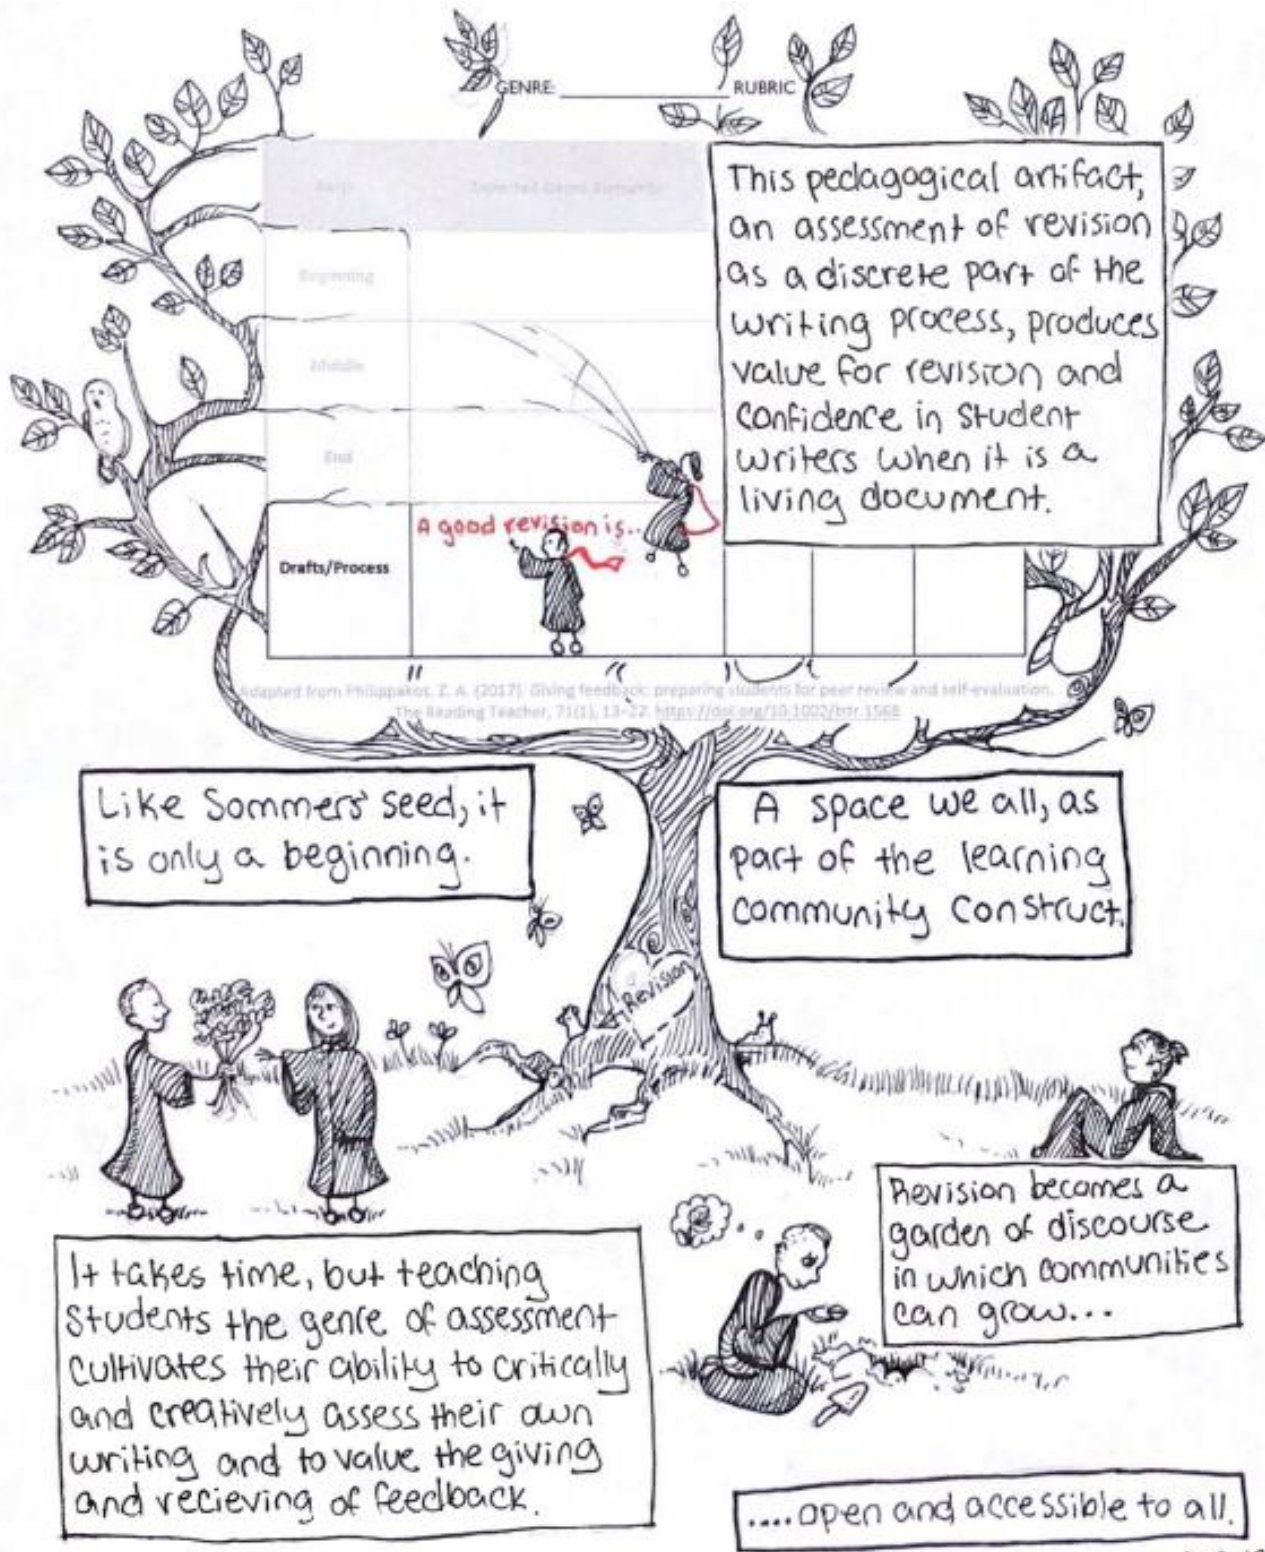

It was strange to leave my old rubric behind...
in hopes of unearthing a new one.

The pedagogical artifact we unearthed led to stronger feedback, increased value for revision, and more confident writers. I hope future efforts assessing revision this way will demonstrate significantly stronger finished writing too.

Acknowledgements

It has been a liberating experience to find my voice in comics, and I would like to gratefully acknowledge those who have supported the development of this particular comic: Rich Shivener for such useful critical and encouraging feedback on my first draft, and Franny Howes, most especially for commenting on the connection I was hoping would be clear between the linework left visible below the ink and topic of the piece. Finally, to Bridget Gelms, who has supported me the entire journey and whose own pedagogical approach to teaching multimodality in the writing process at last gave me the room I needed to begin this comic in the first place.
